PROFESSIONAL PROFILE

Software architect and fullstack developer with 4+ years of experience designing and building complete enterprise solutions. Specialized in scalable system architecture, technical team leadership, and the transformation of manual processes into high-impact digital platforms. Proficient in a modern stack (React, Vue, TypeScript, NestJS) with measurable results in operational efficiency and improved user experience.

WORK EXPERIENCE

Fullstack Web3/DeFi Developer — InforMage Studios, Spain (Remote)

FEBRUARY 2026 — PRESENT

- Development of Web3/DeFi products for the studio: WorldCupPVP and GoCreate.
- 100% remote coordination with InforMage Studios' product and design teams.

Technologies: React, Next.js, TypeScript, Web3, Smart Contracts, REST APIs

Software Architect & Freelance Fullstack Developer — Independent

JUNE 2025 — FEBRUARY 2026

- End-to-end design and development of complete enterprise systems (logistics and operations management).
- Implemented a logistics system for Importadora CugrancaXXI, +35% operational efficiency through full container-cycle automation.
- Developed a management platform for Fuego Abierto GelSoft, +40% profit control with player, match, league, and statistics modules.
- Full ownership of the project lifecycle: architecture, database modeling, frontend, backend, and production deployment.

Technologies: React, TypeScript, NestJS, MySQL, REST APIs, microservices

Fullstack Developer — RedCollege, Santiago, Chile (Remote)

JANUARY 2025 — JUNE 2025

- Developed and maintained fullstack applications for an international edtech startup (754 GitHub contributions).
- Built a reusable internal module in Nuxt, -25% development time for new features.
- Implemented key modules: academic planning and assessments with automated reports (+30% UX improvement).
- Collaborated within an international remote team under agile sprints.

Technologies: Vue, Nuxt, TypeScript, AdonisJS, PostgreSQL

TecoPos Technology Company, Havana

JUNE 2023 — JANUARY 2025

- Progressed from Frontend Developer to Head of Web Department, leading a team of 2 devs under SCRUM (+40% productivity through sprint planning and task assignment).
- Developed the SinTerceros multi-business platform (+50% improvement in search experience, consolidating 5+ businesses) along with administrative, inventory, e-commerce, and landing-page systems.
- Built a reusable component library for forms (–40% development time for new screens) and defined coding standards.
- Coordinated and integrated strategic cross-department projects: tecopay-web (payments) and tecopos-autoservice (POS).
- 3,948 GitHub contributions during the period (1,285 + 2,663).

Technologies: React, TypeScript, Tailwind CSS, Git, REST APIs, agile SCRUM methodologies

Frontend Web Developer — GoDjango Technology Company, Havana

SEPTEMBER 2020 — DECEMBER 2022

- Built 4 complete e-commerce sites with vanilla JavaScript, HTML5, and CSS3 (2–3 months per project).
- Optimized responsive interfaces and improved performance (–30% load times through lazy loading and minification).
- Integrated REST APIs for complete purchase flows (catalog, cart, orders).

Technologies: JavaScript ES6+, HTML5, CSS3, REST APIs, responsive design

EDUCATION

Computer Science Engineering (Studies Interrupted)

2020 — 2022

University of Informatics Sciences (UCI), Havana, Cuba

Studies voluntarily interrupted to focus on professional development.

TECHNICAL SKILLS

Frontend:

React, TypeScript, Vue, Nuxt, JavaScript, Tailwind CSS, HTML5, CSS3

Backend:

NestJS, AdonisJS, Node.js, REST APIs, microservices, Web3, Smart Contracts

Databases:

MySQL, PostgreSQL, data modeling

Tools & Methodologies:

Git, GitHub, Docker, SCRUM, Agile

Architecture: Design patterns, MVC, microservices, scalable systems

LANGUAGES

Spanish: Native

English: B1 (technical reading, written communication)
